- **Device not powering on:** Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again. If it still doesn't turn on, try a forced restart by holding the power button for 10-15 seconds.
- **No network connection (Wi-Fi/4G):** Check if Wi-Fi or mobile data is enabled in settings. For 4G, ensure your SIM card is properly inserted and active. Try restarting the tablet or toggling airplane mode on and off.
- **Slow performance:** Close unused applications running in the background. Clear cache from apps in Settings > Apps & notifications > See all apps > [App Name] > Storage & cache > Clear cache. Consider freeing up storage space.
- **SIM detection issues:** Ensure the SIM card is correctly inserted and the tray is fully closed. Restart the tablet. If the issue persists, try the SIM card in another device to rule out a faulty SIM.
