3. OPERATING YOUR MAC MINI

3.1 macOS and Apple Intelligence

Your Mac mini runs on macOS, providing a user-friendly interface and powerful features. The M4 Pro chip enhances performance across all applications, including those leveraging Apple Intelligence. Apple Intelligence is a personal intelligence system designed to assist with writing, expression, and task completion, all while maintaining robust privacy protections.

3.2 Performance and Connectivity

The M4 Pro chip with its 12-core CPU and 16-core GPU provides significant power for demanding projects such as complex scene rendering, video editing, and compiling large codebases. All your favorite applications, including Microsoft

365 and Adobe Creative Cloud, operate efficiently on macOS.

The Mac mini seamlessly integrates with other Apple devices. Features like iPhone Mirroring allow you to view and control your iPhone from your Mac. You can also copy content on your iPhone and paste it on your Mac, send texts with Messages, and answer FaceTime calls directly from your computer.

4. MAINTENANCE

4.1 General Care

- Keep your Mac mini in a clean, dust-free environment.
- Clean the exterior with a soft, lint-free cloth. Avoid abrasive materials or harsh chemicals.
- Ensure proper ventilation around the device to prevent overheating.

4.2 Software Updates

Regularly update macOS and your applications to ensure optimal performance, security, and access to the latest features. You can check for updates in System Settings (or System Preferences on older macOS versions).

4.3 Storage Management

The Mac mini comes with 512GB SSD storage. If you require additional storage, consider using external drives or cloud storage services. Regularly review and manage your files to optimize disk space.

5. TROUBLESHOOTING

If you encounter issues with your Mac mini, consider the following basic troubleshooting steps:

- **No Power:** Ensure the power cord is securely connected to both the Mac mini and a working power outlet. Try a different outlet if necessary.
- **No Display:** Verify that your monitor is properly connected to the Mac mini via HDMI or Thunderbolt, and that the monitor is powered on and set to the correct input source.
- **Peripheral Issues:** If a keyboard, mouse, or other peripheral is not responding, try disconnecting and reconnecting it. For USB devices, try a different port. For Bluetooth devices, ensure they are paired and charged.
- **Software Unresponsive:** If an application becomes unresponsive, you can force quit it by pressing Command + Option + Esc. If the entire system is unresponsive, press and hold the power button until the Mac mini shuts down, then restart it.
- **Internet Connectivity:** Check your Wi-Fi connection in System Settings or ensure your Ethernet cable is securely connected to a working router or modem.
