Philips Original Replacement Filter FY0910/30 Instruction Manual

For Philips Air Purifiers 800 & 900 Series (AC0950, AC0951, AC0830, AC0850)

1. INTRODUCTION AND OVERVIEW

The Philips FY0910/30 replacement filter is an original Philips component designed to ensure optimal performance of your Philips 800 and 900 Series Air Purifiers. This filter features a multi-layer filtration system, including HEPA NanoProtect and Activated Carbon, to effectively capture airborne particles and odors.

Key Features:

- **3-Layer Filtration:** Composed of a pre-filter, HEPA NanoProtect layer, and activated carbon layer.
- **High Efficiency:** Captures 99.97% of particles as small as 0.003 microns, including pollutants, viruses, allergens, bacteria, and odors.
- **Long Lifespan:** Provides optimal filtration performance for up to 1 year.
- **Compatibility:** Specifically designed for Philips Air Purifier models AC0950, AC0951, AC0830, and AC0850.

2. SETUP: FILTER INSTALLATION

Follow these steps to correctly install the Philips FY0910/30 replacement filter into your air purifier.

1. **Power Off:** Ensure your air purifier is unplugged from the power outlet before beginning.
2. **Access Filter Compartment:** Refer to your air purifier's specific user manual for instructions on how to open the filter compartment. This typically involves removing the back or bottom cover.
3. **Remove Old Filter:** Carefully remove the used filter. Dispose of it according to local regulations.
4. **Unpack New Filter:** Remove the new Philips FY0910/30 filter from its protective packaging.
5. **Insert New Filter:** Place the new filter into the compartment, ensuring it is seated correctly and securely. The filter should fit snugly.
6. **Close Compartment:** Reattach the cover of the filter compartment.
7. **Power On:** Plug the air purifier back into the power outlet.
8. **Reset Filter Life:** After installation, reset the filter lifetime indicator on your air purifier. Consult your air purifier's manual for specific instructions on how to perform this reset.

3. OPERATING THE FILTER (WITHIN AIR PURIFIER)

Once installed, the Philips FY0910/30 filter operates automatically as part of your Philips Air Purifier. The air purifier's intelligent sensors will detect air quality and adjust its operation to optimize filtration.

- **Automatic Filtration:** The filter continuously works to remove pollutants, allergens, and odors from the air as the air purifier runs.
- **Air+ App Integration:** Connect your air purifier to the Philips Air+ app to monitor the filter's status and air quality in real-time.

4. MAINTENANCE

Regular maintenance ensures the longevity and effectiveness of your air purifier and filter.

Filter Replacement

- **Lifespan:** The Philips FY0910/30 filter has a recommended lifespan of up to 1 year. The actual lifespan may vary depending on air quality and usage frequency.
- **Filter Status Indicator:** Your Philips air purifier will notify you when the filter needs to be replaced through an indicator on its display. This ensures timely replacement for continuous optimal performance.

- **Air+ App Monitoring:** Use the Air+ app to track the remaining filter life and receive notifications for replacement.

Image 4.1: The filter offers a lifespan of up to 12 months.

Pre-filter Cleaning

To extend the life of your filter and maintain optimal performance, it is recommended to regularly vacuum the pre-filter layer. This can be done without removing the entire filter from the air purifier, depending on your specific air purifier model. Refer to your air purifier's manual for detailed cleaning instructions.

5. TROUBLESHOOTING

If you encounter issues after installing your new filter, consider the following:

• Air Quality Not Improving:

- Ensure the filter is installed correctly and securely in its compartment.
- Verify that the filter lifetime indicator has been reset after installation. If not, manually reset it according to your air purifier's manual.
- Check if the air purifier itself is operating correctly (e.g., fan running, no error codes).

Advertisements

• Filter Indicator Not Resetting:

- Some air purifiers require a manual reset of the filter life counter after a new filter is installed. Consult your air purifier's user manual for the specific procedure.

• Unusual Odors:

- A new filter might emit a slight odor initially; this should dissipate within a few hours of operation.

- If strong or persistent odors occur, ensure the filter is genuine Philips and not damaged.
