3. SETUP AND CHARGING

3.1 Initial Charging

Before first use, fully charge your Power Groomer. Connect the provided Type-C charging cable to the trimmer's charging port and plug the other end into a compatible USB power adapter (not included). A full charge takes approximately 90 minutes and provides up to 90 minutes (1.5 hours) of continuous runtime.

3.2 Attaching and Detaching Blades/Combs

To attach a blade, align the blade with the trimmer unit and press gently until it clicks into place. To detach, push the blade away from the trimmer unit. For comb attachments, slide the desired comb onto the blade until it securely locks. Ensure the comb is firmly attached before use.

4. OPERATING INSTRUCTIONS

The Power Groomer is designed for versatile use across different body areas. Always ensure your skin is clean and dry before trimming for best results.

4.1 Beard and Hair Trimming

Use the T-shape blade for precise beard styling and hair trimming. Select one of the 6 beard styling combs (1mm, 2mm, 3mm, 6mm, 9mm, 12mm) to achieve your desired length. Move the trimmer against the direction of hair growth for an even trim.

4.2 Body Grooming

Attach the U-shape blade for efficient body hair trimming. Utilize the 2 body combs (3mm, 6mm) for different lengths. Glide the trimmer smoothly over the skin, ensuring consistent contact.

4.3 Nose and Ear Trimming

Attach the specialized nose and ear trimmer attachment. Gently insert the trimmer into your nostril or ear canal and move it in a circular motion to trim unwanted hair. Be cautious and do not insert too deeply.

Image 4.2: Examples of different beard styles achievable with the Power Groomer.

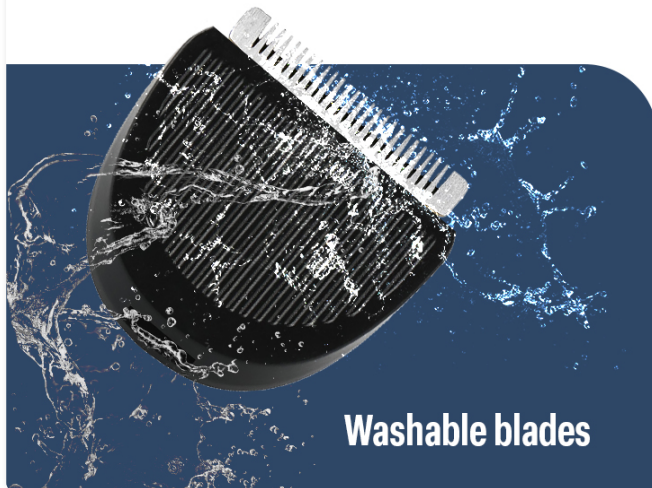

Image 4.3: The Power Groomer enables a hair-free and carefree lifestyle.

5. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and longevity of your trimmer.

5.1 Detachable and Washable Blades

The Power Groomer features detachable blades for easy cleaning. After each use, detach the blade from the trimmer unit. Rinse the detached blade under running water to remove hair clippings. The trimmer unit itself is not fully waterproof; only the blades are washable (IPX5 rated).

Painless ear and
nose hair removal

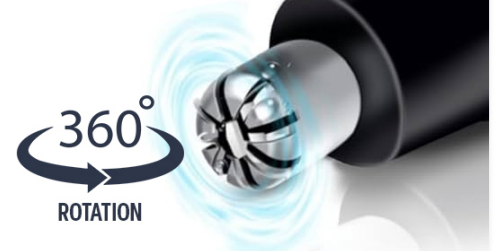

Image 5.1: Illustration of washable blades and the nose trimmer's design for easy cleaning.

5.2 Drying and Reattaching

After rinsing, ensure the blades are thoroughly dried before reattaching them to the trimmer unit. You can use the provided cleaning brush to remove any stubborn hair particles from the blades and the trimmer head.

6. TROUBLESHOOTING

If you encounter issues with your Power Groomer, refer to the following common solutions:

Problem	Possible Cause	Solution
Trimmer does not turn on.	Battery is depleted.	Charge the trimmer for 90 minutes using the Type-C cable.
Poor trimming performance.	Blades are clogged with hair or not properly attached.	Clean the blades thoroughly. Ensure the blade and comb are securely attached.
Trimmer makes unusual noise.	Hair caught in the motor or blade mechanism.	Detach and clean the blade. Ensure no foreign objects are present.

If the issue persists after attempting these solutions, please contact customer support.
