BEARDO Studio Professional Tornado Hair Dryer User Manual

Model: 8906084799057

1. INTRODUCTION

Thank you for choosing the BEARDO Studio Professional Tornado Hair Dryer. This manual provides essential information for the safe and effective operation, maintenance, and troubleshooting of your new hair dryer. Designed for both home and professional use, this powerful 2000W AC motor hair dryer offers customizable settings and advanced technology for optimal hair care.

2. SAFETY INFORMATION

WARNING: Keep away from children.

- Always unplug the appliance immediately after use.
- Do not use while bathing or in a shower.
- Do not place or store the appliance where it can fall or be pulled into a tub or sink.
- Do not place in or drop into water or other liquid.
- If the appliance falls into water, do not reach for it. Unplug it immediately.
- Do not use near water.
- Always inspect the power cord for damage before use. Do not use if the cord is damaged.
- This appliance has an Overheat Protection System. If the unit overheats, it will automatically power off. Allow it to cool down before resuming use.

Image: Internal view highlighting the Overheat Protection System, which automatically powers off the device if it reaches high temperatures to protect the user's scalp and the device itself.

3. PRODUCT FEATURES

- **Powerful 2000W AC Motor:** Delivers strong airflow for ultra-fast drying and long-lasting professional performance.
- **3 Heat & 2 Speed Settings:** Customizable airflow and temperature control for all hair types and styling needs.
- **Cool Shot Button:** Locks in hairstyles with a burst of cool air for long-lasting hold & shine.
- **Advanced EHD+ Technology:** Even heat distribution ensures frizz-free drying with reduced heat damage.
- **Professional Attachments Included:** Comes with concentrator nozzle, diffuser & comb for precise styling, curls, volume & beard grooming.
- **Overheat Protection System:** Built-in safety feature prevents overheating for safe and reliable daily use.
- **Ergonomic & Durable Design:** Lightweight build with balanced grip for comfortable long styling sessions.

MORE THAN JUST ELECTRONICS

CRAFTED FOR GROOMING,
RELAXATION, AND EVERYDAY
PERFORMANCE
DESIGNED TO MATCH
THE LIFESTYLE OF
THE MODERN MAN.

Image: Illustration of EHD+ Technology ensuring even heat distribution for uniform airflow and no damage to the scalp.

4. PACKAGE CONTENTS

Your BEARDO Studio Professional Tornado Hair Dryer package includes:

- BEARDO Studio Professional Tornado Hair Dryer Unit
- Concentrator Nozzle
- Diffuser
- Styling Comb

Image: The three included attachments: Concentrator Nozzle for precise styling, Comb for adding volume, and Diffuser for preventing frizz on curly hair.

5. SETUP

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Attach Accessories:** Select the desired attachment (concentrator, diffuser, or comb). Align the attachment with the front nozzle of the hair dryer and push it firmly until it clicks into place. Ensure it is securely attached before use.
3. **Power Connection:** Plug the power cord into a suitable electrical outlet. Ensure the voltage matches the specifications of the hair dryer.

6. OPERATING INSTRUCTIONS

Familiarize yourself with the controls before operating the hair dryer.

Image: Detailed view of the control panel, indicating the Cool Shot button, and separate switches for 2 Speed Settings and 3 Temperature Settings.

1. **Power On/Off:** Slide the main power switch to the 'ON' position to start the hair dryer. Slide it to 'OFF' to turn it off.
2. **Adjust Speed Settings:** Use the speed control switch to select between 2 airflow speeds: low (gentle drying) or high (fast drying).
3. **Adjust Temperature Settings:** Use the temperature control switch to select from 3 heat settings: cool, warm, or hot.
4. **Cool Shot Function:** Press and hold the 'Cool Shot' button for a burst of cool air. This helps to set your hairstyle and add shine. Release the button to return to the previous heat setting.

HEAT SETTING
helps structure
hair to add volume
and texture

COOL SETTING
seals the cuticle
of the hair shaft
and locks your
style into place

Image: Visual explanation of heat and cool settings. Heat helps structure hair for volume and texture, while the cool setting seals the hair cuticle to lock in style.

Using Attachments:

- **Concentrator Nozzle:** Ideal for precise styling and directing airflow to specific sections of hair. Use with a brush for smooth, sleek results.
- **Diffuser:** Best for enhancing natural curls and waves, and adding volume. Use on low speed and low heat, gently cupping sections of hair in the diffuser.
- **Styling Comb:** Designed to add volume, especially for thin hair, and for beard grooming.

7. MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your hair dryer.

1. **Cleaning the Air Filter:** The rear air filter should be cleaned regularly to prevent lint and dust buildup, which can restrict airflow and cause overheating. Twist or pull off the rear filter cover (refer to product diagram if available). Use a soft brush or vacuum cleaner to remove any debris. Replace the filter cover securely.
2. **General Cleaning:** Wipe the exterior of the hair dryer with a soft, damp cloth. Do not use abrasive

cleaners or solvents. Ensure the appliance is unplugged and completely cool before cleaning.

3. **Storage:** Store the hair dryer in a cool, dry place. Do not wrap the power cord tightly around the appliance, as this can damage the cord. Use the hanging loop if available.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Hair dryer does not turn on.	No power supply; Power switch is off; Faulty outlet.	Check if the power cord is securely plugged in. Ensure the power switch is in the 'ON' position. Test the outlet with another appliance.
Hair dryer stops working during use.	Overheat protection activated; Blocked air intake/outlet.	Unplug the dryer and allow it to cool down for several minutes. Clean the air filter to ensure no blockages.
Weak airflow.	Blocked air filter.	Clean the air filter as described in the Maintenance section.
Unusual noise or smell.	Internal issue; Foreign object.	Immediately unplug the dryer. Do not attempt to repair. Contact customer support.
