STUNNER

CAR VACUUM CLEANER

[MODEL: BAV-150B / BAV-150H]

DESCRIPTION:

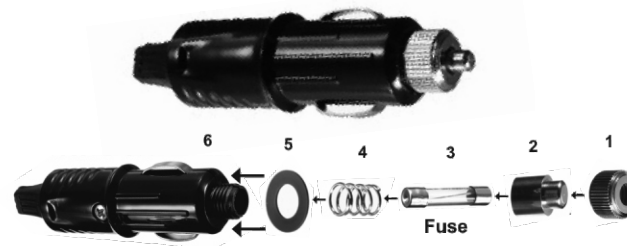

USING THE APPLIANCE:

1. Remove the appliance and its accessories from the box.
2. Insert the Power Cord plug into the 12V DC cigarette lighter socket of the car.
3. The light on the Vacuum Cleaner will glow to indicate the power supply.
4. Attach the required accessory (nozzle/brush/hose) or simply use without any accessory.
Note: The brush attachment needs to be mounted on top of the nozzle attachment for use and not directly on the device.
5. Switch it ON by pushing the power button forward and begin to use.
6. After using it, turn off the switch and remove the plug from the socket.

REMOVING THE DUST BOX:

1. Press the Dust Box Release Button to remove the Dust Box.
2. Remove the dust in the box and clean the filter under running tap water.
3. Align the filter properly in the dust box again such that there is no gap.

REPLACING THE FUSE:

1. It is possible that due to some reason, the fuse of the cigarette lighter plug blows off.
2. When you do not see the light glowing on the device, it is possible that the fuse needs to be replaced.
3. To replace the fuse, unscrew part 1 from its housing.
4. Remove the fuse (part 3) located below it and replace with a new spare fuse (provided along with the appliance).
5. Then screw the part 1 back to its original location (as shown in the above diagram).
6. The appliance is now ready to use.

CARE & PRECAUTIONS:

1. Clean the filter regularly. Only a clean and dry filter will ensure maximum suction power. Always ensure that the filter is securely held in its place.
2. If the appliance loses suction power or makes abnormal noise, check that the vacuum inlet is not blocked or the filter is not too dirty.
3. In case of any abnormal operation such as motor over-heating, stop the appliance immediately and check for blockages in the vacuum inlet or accessory.
4. Ensure that the neck of the filter gets properly inserted in the dust box, such that there is no gap.

SPECIFICATIONS:

Voltage: 12V DC

Max Power: 150W

Power Cord Length: 5m

Filter: Stainless Steel HEPA Filter

No of Attachments/Accessories: 3

Usage: Wet & Dry

CAUTION

TERMS & CONDITIONS FOR WARRANTY

1. Bergmann offers **1 year warranty** from the date of purchase of the product.
2. Bergmann does not offer on-site service. The faulty device needs to be carried in or couriered to our Service Centre located in Mumbai at the address given overleaf. The courier charges or any other charges associated with sending the device to our Service Centre would be borne by the customer. Once the faulty device reaches our Service Centre, we will repair or replace the product, as deemed fit by us.
3. While claiming the warranty, it is mandatory to produce the Original Invoice and the Warranty Card (filled completely in).
4. The following malfunctions are eliminated free of charge during the warranty period:
 - Damage to product as a result of use of faulty materials in the construction of the product.
 - Assembly defects due to the fault of the manufacturer.Defective components of the power product are repaired for free or replaced by new components during the warranty period. The Company reserves the right to decide whether the component will be repaired or replaced. Defective parts that have been replaced become the property of the Company.
5. The warranty does not cover:
 - Malfunctions of the product caused by the failure to comply with the operating instructions;
 - Mechanical damage (cracks, chips, mechanical damage to power cords, mechanical damage to the enclosure, etc.), damage caused by exposure to aggressive environments and high temperatures, damage caused by the ingress of liquids or foreign matter into ventilation grids of the electric products, as well as damage due to improper storage (corrosion of metal parts etc.);
 - Products with defects which were caused by an overload (simultaneous failure of the rotor and the stator), improper use (usage of blunt, unsuitable, unbalanced or improperly chosen replacement devices), lack of maintenance or care, and use of products for purpose other than the intended purpose, as well as by the instability of electric power supply. Among others, undeniable signs of an overload include: change in appearance, deformation or melting of parts and components of the product, darkening or charring of wire insulation under high temperature;
 - Long-term wear of the products and their parts (for example expiration of the full service life, high levels of dirt and grime on the inside or outside of the products, worn lubricants);
 - Products that have been disassembled or repaired during the warranty period by unauthorized third parties (people or persons) for the purpose of repair;
 - Preventive maintenance performed on the power products by the purchaser such as cleaning, rinsing, and lubricating;
6. Non-commercial use of the products imposes limitations on the duration of its operation and restricts the intended usage to household purposes only. A 10-15 minute break is to be made after every 10 minutes of continuous operation. Ignoring this condition when using the products is a violation of the good operating practices and may not be covered in the warranty.
